

# Practical no 1

## Q1.

```
#include<stdio.h>
```

```
int main ()
```

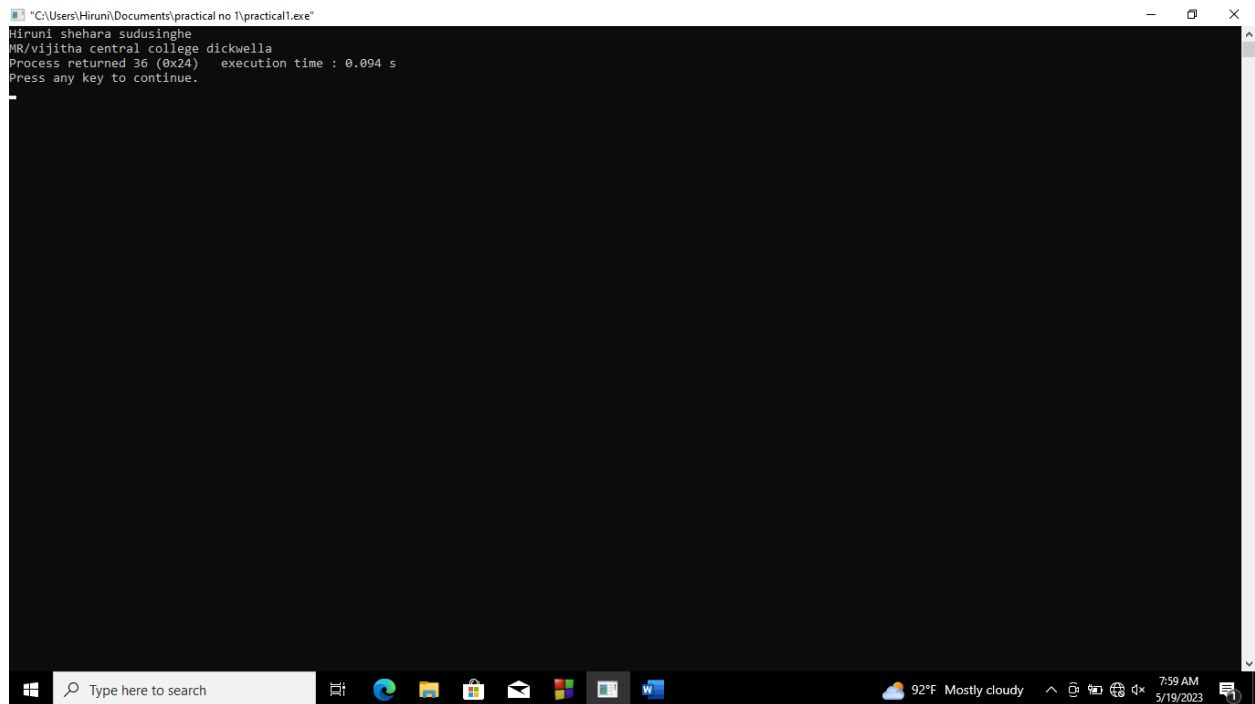

```
{
```

```
    printf("Hiruni Shehara Sudusinghe\n");
```

```
    printf("MR/Vijitha Central College Dickwella");
```

```
}
```

## OUTPUT

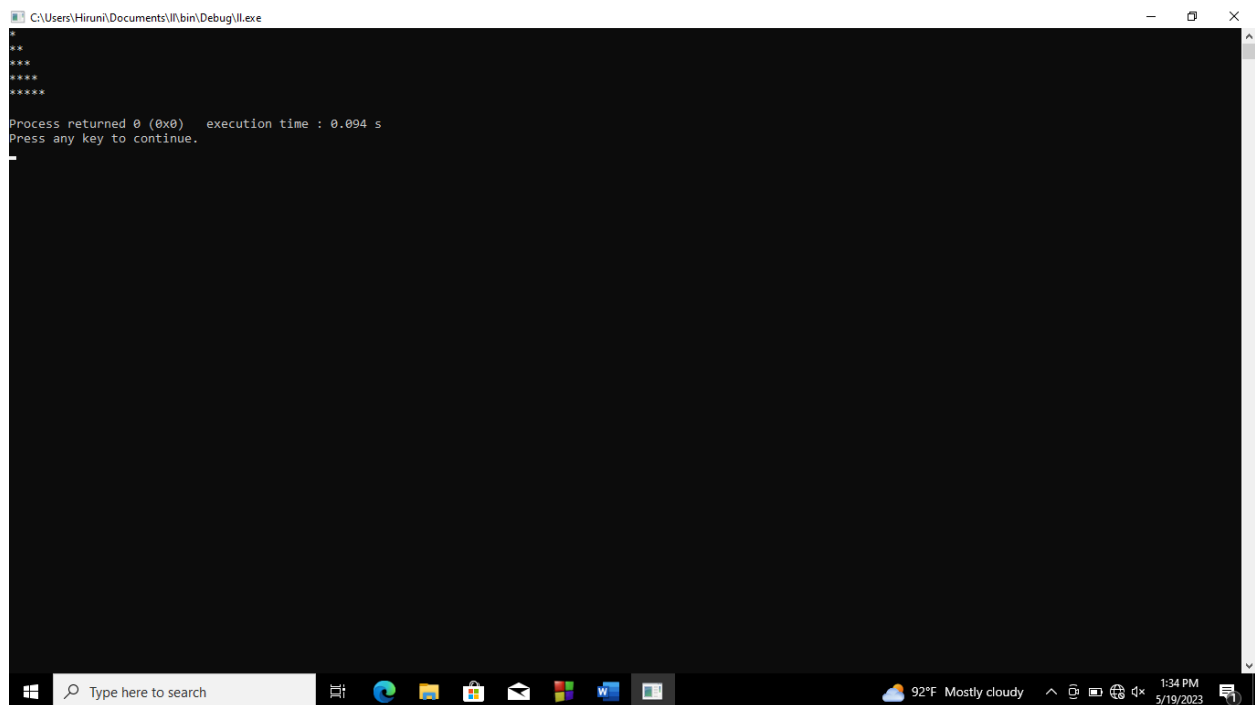

```
"C:\Users\Hiruni\Documents\practical no 1\practical1.exe"
Hiruni shehara sudusinghe
MR/vijitha central college dickwella
Process returned 36 (0x24)  execution time : 0.094 s
Press any key to continue.
```

## Q2.

```
#include<stdio.h>

int main ()
{
    printf("*\n");
    printf("**\n");
    printf("***\n");
    printf("****\n");
    printf("*****\n");
}
```

## OUTPUT

```
C:\Users\Hirun\Documents\ll\bin\Debug\ll.exe
*
**
***
****
*****
Process returned 0 (0x0)   execution time : 0.094 s
Press any key to continue.
```

### Q3.

```
#include<stdio.h>

int main ()
{
    int itemno, qty;
    char desc[20];
    float price, tprice;
    printf("enter item no");
    scanf("%d",&itemno);
    printf ("enter item quantity");
    scanf("%d",&qty);
    printf("enter item description");
    scanf("%c",&desc);
    printf("enter item price");
    scanf("%f",&price);
    tprice=qty*price;
    printf("item no %d\n", &itemno);
    printf("description %c\n",&desc);
    printf("total price %.2f\n",&tprice);
}
```

### Q4.

```
#include<stdio.h>

int main()
{
    int num1,num2,total;
    printf("enter first number");
    scanf("%d",&num1");
    printf("enter second number");
```

```
scanf("%d",&num2");

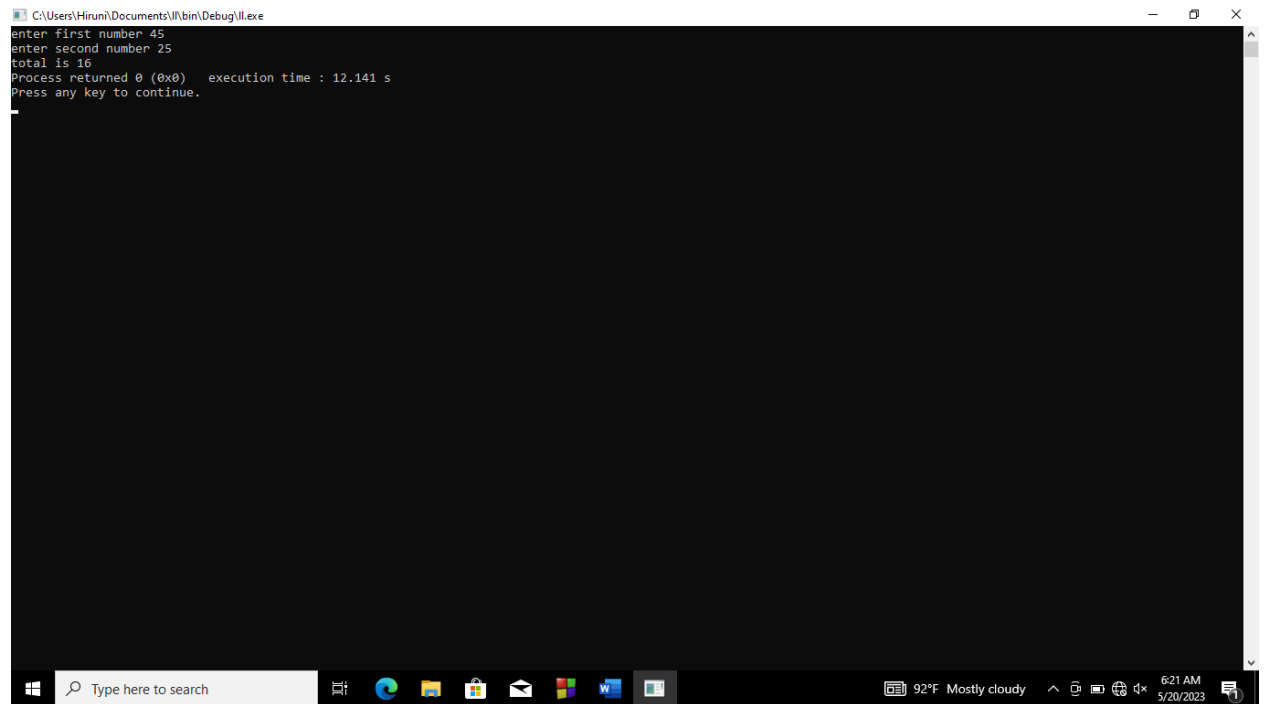

total=num1+num2;

printf("total is %d",total);

return 0;

}
```

## Output

```
C:\Users\Hiruni\Documents\ll\bin\Debug\ll.exe
enter first number 45
enter second number 25
total is 16
Process returned 0 (0x0)   execution time : 12.141 s
Press any key to continue.
```

## Q5.

```
#include<stdio.h>

int main()

{

    float num1,num2,total;

    printf("enter first number");

    scanf("%d",&num1");

    printf("enter second number");

    scanf("%d",&num2");
```

```
total=num1+num2;

printf("total is %d",total);

return 0;

}
```

## **Q6.**

```
#include<stdio.h>

int main()

{

    float num1,num2,total;

    printf("enter first number");

    scanf("%d",&num1");

    printf("enter second number");

    scanf("%d",&num2");

    total=num1+num2;

    printf("total is %d",total);

    return 0;

}
```

## **Q7.**

```
#include<Stdio.h>

int main()

{

    float num1, num2, temp;

    printf(" Enter the first number");

    scanf("%f",&num1);

    printf("Enter the second number");
```

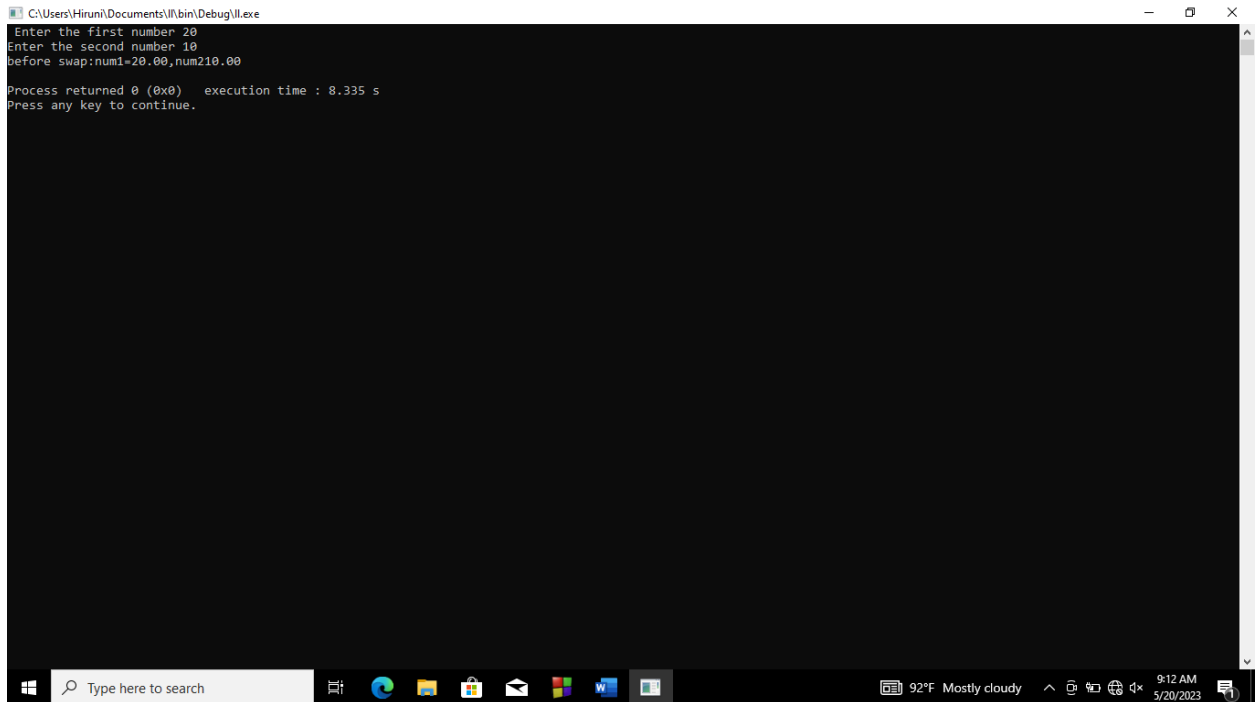

```
scanf("%f",& num2);

printf("before swap:num1=%.2f,num2%.2f\n",num1,num2);

return 0;

}
```

## Output

```
C:\Users\Hiruni\Documents\VL\bin\Debug\VL.exe
Enter the first number 20
Enter the second number 10
before swap:num1=20.00,num210.00

Process returned 0 (0x0)   execution time : 8.335 s
Press any key to continue.
```

## Practical no 2

### Q1.

```
#include<Stdio.h>

int main()

{

    int age;

    printf("HI HOW OLD ARE YOU?\n");
```

```
scanf("%d",&age);

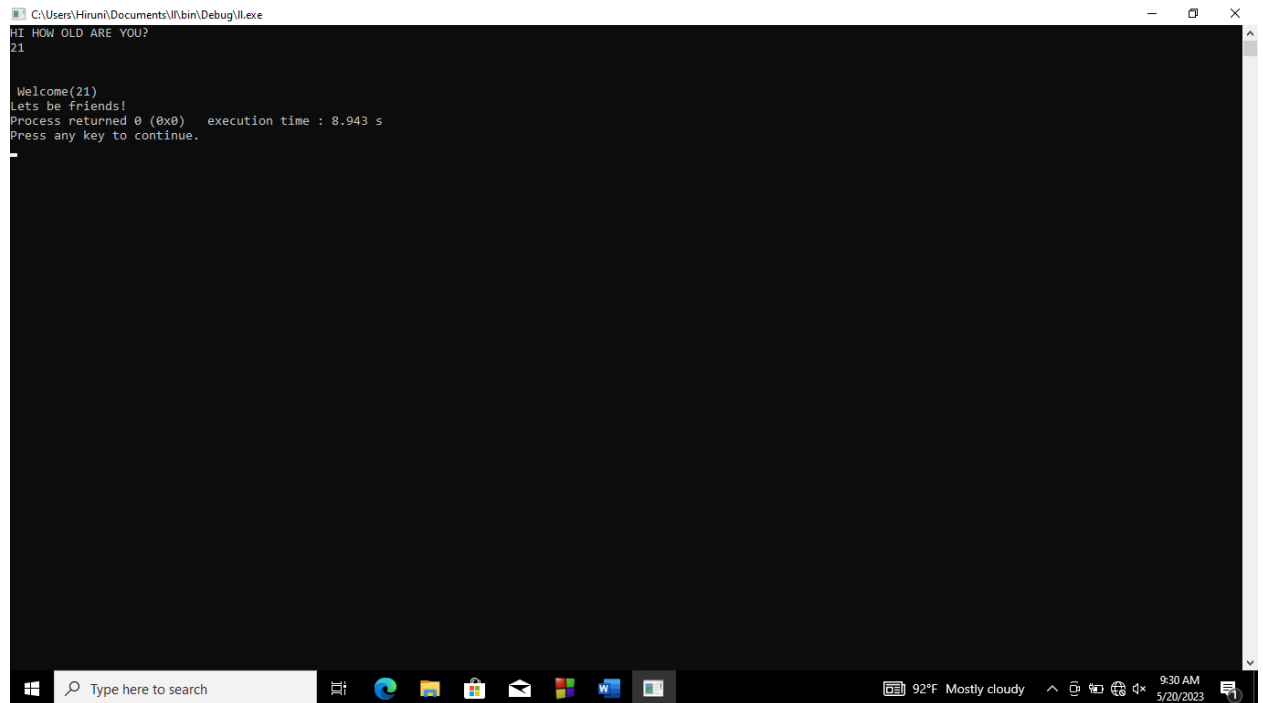

printf("\n\n Welcome(%d)",age);

printf("\nLets be friends!");

return 0;

}
```

## Output

```
C:\Users\Hiruni\Documents\ll\bin\Debug\ll.exe
HI HOW OLD ARE YOU?
21

Welcome(21)
Lets be friends!
Process returned 0 (0x0) execution time : 8.943 s
Press any key to continue.
```

## Q3.

```
#include<Stdio.h>
```

```
int main()
```

```
{
```

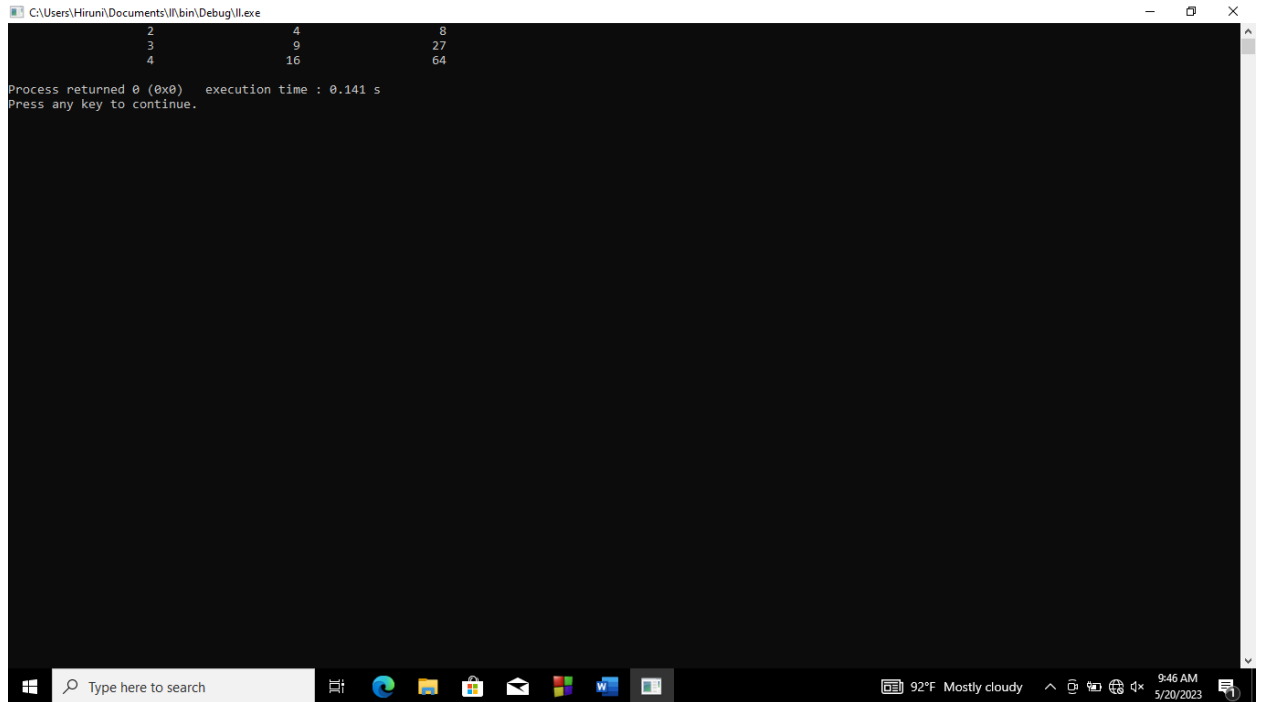

```
printf("%20d%20d%20d\n",2,4,8);
```

```
printf("%20d%20d%20d\n",3,9,27);
```

```
printf("%20d%20d%20d\n",4,16,64);
```

```
    return 0;
}
```

## output

```
C:\Users\Hiruni\Documents\ll\bin\Debug\ll.exe
 2      4      8
 3      9     27
 4     16     64

Process returned 0 (0x0)   execution time : 0.141 s
Press any key to continue.
```

## Q3.

```
#include<Stdio.h>
```

```
int main()
```

```
{
```

```
    double distance,speed,time;
```

```
    printf("enter total distance (in meters)");
```

```
    scanf("%if",&distance);
```

```
    printf("enter the time (in seconds)");
```

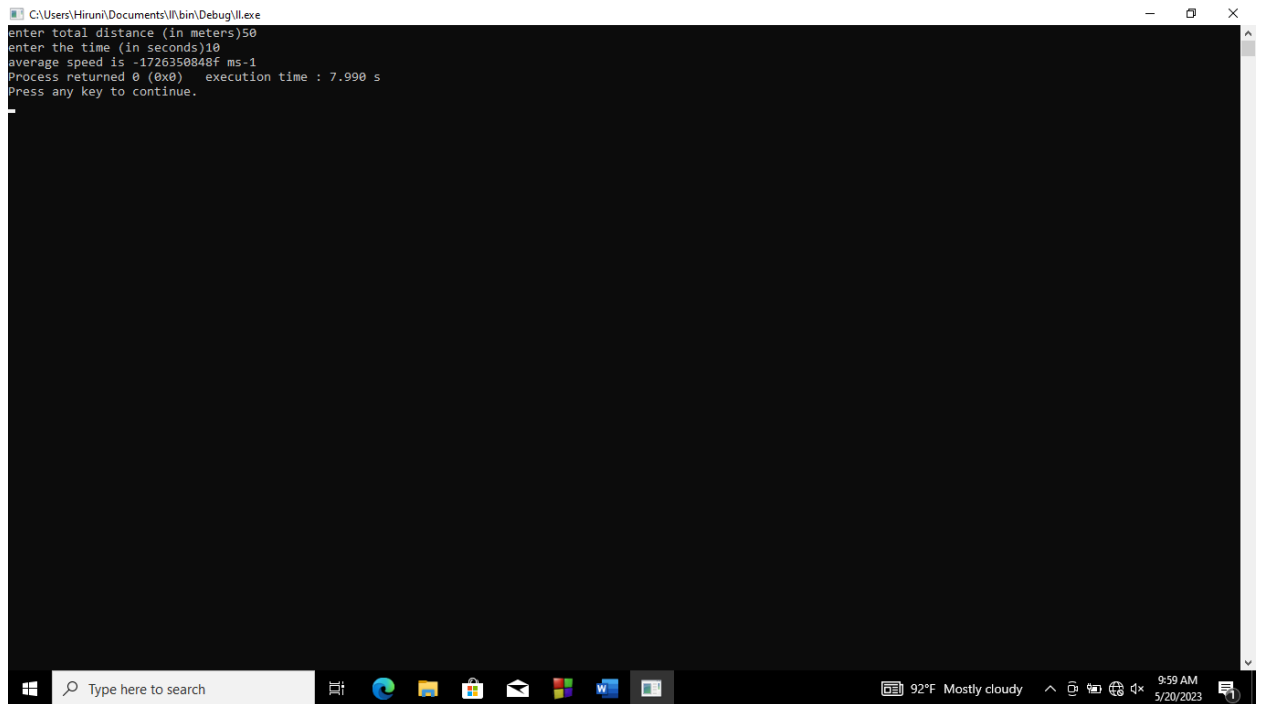

```
    scanf ("%if,time");
```

```
    speed=distance/time;
```

```
    printf("average speed is %f ms-1");  
  
    return 0;  
  
}
```

## Output

```
C:\Users\Hiruni\Documents\Ull\bin\Debug\Ull.exe  
enter total distance (in meters)50  
enter the time (in seconds)10  
average speed is .1726350848f ms-1  
Process returned 0 (0x0)   execution time : 7.990 s  
Press any key to continue.
```

## Q4.

```
#include<Stdio.h>  
  
int main()  
{  
    float temp,fehr,celsius;  
    printf("Enter temperature in farenhiet");  
    scanf("%f",&fehr);  
  
    celsius=(fehr-32)*(5/9);  
    printf("temperature in celsius;%.2f",celsius);
```

```
return 0;
```

```
}
```
